Hydrodynamics of High-Performance Marine Vessels: Volume 1 Prof Lawrence J. Doctors

This is a comprehensive two-volume set of books devoted to the hydrodynamics of high-performance marine vessels. These vessels may also be generally referred to as high-speed or advanced marine craft. Types of craft addressed include monohulls, catamarans, trimarans and other multihull vessels, air-cushion vehicles, surface-effect ships and planing craft. The hydrodynamic aspects dealt with are the steady-state resistance, wave generation, sinkage and trim, unsteady effects and motions in waves. Separate chapters are devoted to viscous resistance, transom sterns and the behavior of skirts for air-cushion vehicles and seals for surfaceeffect ships. Effects of the finite depth of the water and the possible lateral restriction on the width of the waterway feature prominently in the books. In each case, the presentation includes a full analytical development of the theory accompanied by a comparison of the theoretical predictions with extensive experimental data. In the two volumes there is a total of 888 full-color Letter-size pages. The text is accompanied by 433 photographs of ships and ship models, 1155 graphs, 1295 equations and 1249 references. The work represents the author's research, consulting and professional experience in both universities and research centers spanning a period of over fifty years. The books are targeted at universitylevel students and specialized industry engineers in the field of naval architecture and associated areas.

From reader reviews:

David Musick:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each guide has different aim or perhaps goal; it means that reserve has different type. Some people really feel enjoy to spend their time to read a book. They may be reading whatever they get because their hobby is actually reading a book. Consider the person who don't like studying a book? Sometime, man or woman feel need book whenever they found difficult problem or even exercise. Well, probably you should have this Hydrodynamics of High-Performance Marine Vessels: Volume 1.

Cheryl Kirkland:

Book is to be different for every single grade. Book for children until adult are different content. As it is known to us that book is very important usually. The book Hydrodynamics of High-Performance Marine Vessels: Volume 1 had been making you to know about other expertise and of course you can take more information. It is very advantages for you. The reserve Hydrodynamics of High-Performance Marine Vessels: Volume 1 is not only giving you far more new information but also being your friend when you feel bored. You can spend your current spend time to read your e-book. Try to make relationship using the book Hydrodynamics of High-Performance Marine Vessels: Volume 1. You never sense lose out for everything when you read some books.

William Burmeister:

Your reading sixth sense will not betray anyone, why because this Hydrodynamics of High-Performance Marine Vessels: Volume 1 publication written by well-known writer who really knows well how to make book which might be understand by anyone who also read the book. Written in good manner for you, leaking every ideas and composing skill only for eliminate your hunger then you still question Hydrodynamics of High-Performance Marine Vessels: Volume 1 as good book not only by the cover but also by content. This is one e-book that can break don't assess book by its deal with, so do you still needing another sixth sense to pick this specific!? Oh come on your reading through sixth sense already said so why you have to listening to a different sixth sense.

Joshua Little:

In this period globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. The book that recommended to you is Hydrodynamics of High-Performance Marine Vessels: Volume 1 this publication consist a lot of the information in the condition of this world now. This kind of book was represented how can the world has

grown up. The dialect styles that writer use for explain it is easy to understand. Often the writer made some analysis when he makes this book. Honestly, that is why this book appropriate all of you.
