Mathematical Analysis I (UNITEXT)

Claudio Canuto, Anita Tabacco

Mathematical Analysis I (UNITEXT) Claudio Canuto, Anita Tabacco

The purpose of the volume is to provide a support for a first course in Mathematics. The contents are organised to appeal especially to Engineering, Physics and Computer Science students, all areas in which mathematical tools play a crucial role. Basic notions and methods of differential and integral calculus for functions of one real variable are presented in a manner that elicits critical reading and prompts a hands-on approach to concrete applications. The layout has a specifically-designed modular nature, allowing the instructor to make flexible didactical choices when planning an introductory lecture course. The book may in fact be employed at three levels of depth. At the elementary level the student is supposed to grasp the very essential ideas and familiarise with the corresponding key techniques. Proofs to the main results befit the intermediate level, together with several remarks and complementary notes enhancing the treatise. The last, and farthest-reaching, level requires the additional study of the material contained in the appendices, which enable the strongly motivated reader to explore further into the subject. Definitions and properties are furnished with substantial examples to stimulate the learning process. Over 350 solved exercises complete the text, at least half of which guide the reader to the solution. This new edition features additional material with the aim of matching the widest range of educational choices for a first course of Mathematics.

From reader reviews:

Joni Griffith:

Have you spare time for just a day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a walk, shopping, or went to typically the Mall. How about open or maybe read a book entitled Mathematical Analysis I (UNITEXT)? Maybe it is to become best activity for you. You know beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have additional opinion?

Mindy Martinez:

As people who live in the particular modest era should be upgrade about what going on or facts even knowledge to make all of them keep up with the era and that is always change and move forward. Some of you maybe will probably update themselves by studying books. It is a good choice for you but the problems coming to anyone is you don't know what kind you should start with. This Mathematical Analysis I (UNITEXT) is our recommendation to help you keep up with the world. Why, because book serves what you want and need in this era.

Arthur Faust:

Exactly why? Because this Mathematical Analysis I (UNITEXT) is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will shock you with the secret this inside. Reading this book next to it was fantastic author who all write the book in such incredible way makes the content inside easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of benefits than the other book get such as help improving your expertise and your critical thinking way. So , still want to hesitate having that book? If I had been you I will go to the publication store hurriedly.

Angel Sullivan:

In this period of time globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher that print many kinds of book. Often the book that recommended for you is Mathematical Analysis I (UNITEXT) this guide consist a lot of the information on the condition of this world now. This kind of book was represented how does the world has grown up. The dialect styles that writer require to explain it is easy to understand. Often the writer made some research when he makes this book. Here is why this book suited all of you.
