Tcp/Ip Applications Programming for Os/2: With Applications for Presentation Manager Steven J. Gutz

There are currently very few books for OS/2 programmers, and even the documentation from IBM is limited. This book, and the companion disk, provide programmers with detailed techniques for creating effective TCP/IP applications for OS/2 using the C or C++ programming languages. Covers advanced aspects of OS/2 application programmer interface (API) and TCP/IP socket interface programming, the development of a standard class library for Common User Interface (CUA '91) controls, and drag-and-drop and network interfacing. For programmers writing applications for OS/2 PM and TCP/IP.
