Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391) Michael Aschbacher, Radha Kessar, Bob Oliver

A fusion system over a p -group S is a category whose objects form the set of all subgroups of S , whose morphisms are certain injective group homomorphisms, and which satisfies axioms first formulated by Puig that are modelled on conjugacy relations in finite groups. The definition was originally motivated by representation theory, but fusion systems also have applications to local group theory and to homotopy theory. The connection with homotopy theory arises through classifying spaces which can be associated to fusion systems and which have many of the nice properties of p -completed classifying spaces of finite groups. Beginning with a detailed exposition of the foundational material, the authors then proceed to discuss the role of fusion systems in local finite group theory, homotopy theory and modular representation theory. The book serves as a basic reference and as an introduction to the field, particularly for students and other young mathematicians.

From reader reviews:

James Baron:

Reading a book can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new details. When you read a book you will get new information because book is one of many ways to share the information as well as their idea. Second, studying a book will make you more imaginative. When you examining a book especially fictional works book the author will bring you to definitely imagine the story how the character types do it anything. Third, you could share your knowledge to others. When you read this Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391), you may tells your family, friends as well as soon about yours guide. Your knowledge can inspire the mediocre, make them reading a publication.

Brandon Harmon:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you might have it in e-book technique, more simple and reachable. This kind of Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391) can give you a lot of buddies because by you taking a look at this one book you have thing that they don't and make you more like an interesting person. This particular book can be one of one step for you to get success. This publication offer you information that might be your friend doesn't understand, by knowing more than additional make you to be great individuals. So , why hesitate? Let me have Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391).

Serafina Hayes:

As a pupil exactly feel bored in order to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring in addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391) can make you truly feel more interested to read.

Sharon Hardin:

What is your hobby? Have you heard which question when you got pupils? We believe that that issue was given by teacher to their students. Many kinds of hobby, Every person has different hobby. So you know that little person such as reading or as looking at become their hobby. You have to know that reading is very important in addition to book as to be the factor. Book is important thing to provide you knowledge, except

your teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is actually Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391).
