Smart Work U: Get Your Degree the Smart Way - Save Time & Money Hona Amer

Is it possible to go to college for two-and-a-half years and graduate with a Bachelor's degree? Author, Hona Amer, did. In the book, *Smart Work U*, she shares the principles, techniques, and strategies she used so you can make your way through college and graduate in less than four years.

Smart Work U is a movement of people who have had enough with student loan debt. Can you think of at least one person you know who graduated college with student loan debt? Has it limited their decisions after college? Have they settled for less than their dreams? Hona Amer, founder of Smart Work U, helps students implement specific strategies to avoid student loan debt.

The modern college experience is very different than it was a generation ago. This was before the Internet, before the proliferation of home computers, and before the fast-pace digital world we live in today. These days, things are much different. We're a generation who grew up multi-tasking. We have technology that enables us to do things in a fraction of the time it took to do them just ten years ago.

So shouldn't our college experience be different too? Since we get information in new ways, since we have to process so much more data, since we have new technology at our disposal, is going to college for four years to earn a Bachelor's degree really necessary? She proved that it isn't.

From scholarships, grants, study tips to CLEP tests and personal finances, you will learn the secrets to college that *no one else is talking about*. Amer challenges "old school thinking" that you have to have thousands of dollars of debt to graduate and it takes 4 or more years. Your college adventure awaits you. Are you ready? Let's get started...right now!
