F# for Scientists Jon Harrop

"This work strikes a balance between the pure functional aspects of F# and the object-oriented and imperative features that make it so useful in practice, enable .NET integration, and make large-scale data processing possible."

—Thore Graepel, PhD, Researcher, Microsoft Research Ltd.

Over the next five years, F# is expected to become one of the world's most popular functional programming languages for scientists of all disciplines working on the Windows platform. F# is free and, unlike MATLAB® and other software with numerical/scientific origins, is a full-fledged programming language.

Developed in consultation with Don Syme of Microsoft Research Ltd.—who wrote the language—*F# for Scientists* explains and demonstrates the powerful features of this important new programming language. The book assumes no prior experience and guides the reader from the basics of computer programming to the implementation of state-of-the-art algorithms.

F# for Scientists begins with coverage of introductory material in the areas of functional programming, .NET, and scientific computing, and goes on to explore:

- Program structure
- Optimization
- Data structures
- Libraries
- Numerical analysis
- Databases
- Input and output
- Interoperability
- Visualization

Screenshots of development using Visual Studio are used to illustrate compilation, debugging, and interactive use, while complete examples of a few whole programs are included to give readers a complete view of F#'s capabilities.

Written in a clear and concise style, *F# for Scientists* is well suited for researchers, scientists, and developers who want to program under the Windows platform. It also serves as an ideal supplemental text for advanced undergraduate and graduate students with a background in science or engineering.

From reader reviews:

Christine McClellan:

This F# for Scientists is great publication for you because the content which is full of information for you who always deal with world and have to make decision every minute. This kind of book reveal it details accurately using great coordinate word or we can state no rambling sentences inside it. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only offers you straight forward sentences but tricky core information with beautiful delivering sentences. Having F# for Scientists in your hand like finding the world in your arm, information in it is not ridiculous a single. We can say that no guide that offer you world in ten or fifteen minute right but this guide already do that. So , this is good reading book. Heya Mr. and Mrs. active do you still doubt that?

Josephine Mares:

Beside this F# for Scientists in your phone, it can give you a way to get nearer to the new knowledge or data. The information and the knowledge you can got here is fresh through the oven so don't always be worry if you feel like an older people live in narrow town. It is good thing to have F# for Scientists because this book offers to your account readable information. Do you at times have book but you rarely get what it's interesting features of. Oh come on, that wil happen if you have this inside your hand. The Enjoyable option here cannot be questionable, including treasuring beautiful island. So do you still want to miss that? Find this book along with read it from currently!

Ian Bracy:

As we know that book is significant thing to add our expertise for everything. By a reserve we can know everything we really wish for. A book is a range of written, printed, illustrated or blank sheet. Every year had been exactly added. This reserve F# for Scientists was filled about science. Spend your time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading any book. If you know how big advantage of a book, you can sense enjoy to read a guide. In the modern era like now, many ways to get book that you simply wanted.

Sue Randall:

What is your hobby? Have you heard this question when you got scholars? We believe that that question was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you know that little person just like reading or as reading through become their hobby. You need to understand that reading is very important and book as to be the thing. Book is important thing to provide you knowledge, except your own teacher or lecturer. You find good news or update regarding something by book. Many kinds of books that can you take to be your object. One of them is actually F# for Scientists.
