Global Cinematic Cities: New Landscapes of Film and Media

Cinema and audiovisual media are integral to the culture, economy and social experience of the contemporary global city. But how has the relationship between cinema and the urban environment evolved in the era of digital technology, new media and globalization? And what are the critical tools and concepts with which we can grasp this vital interconnection between space and screen, viewer and built environment? Engaging with a rapidly transforming urban world, the contributions to this collection rethink the 'cinematic city' at a global scale. By presenting a global constellation of screen cities within one volume, the book encourages juxtapositions and comparisons across the North and South to capture the global city and its dynamics of exchange, hybridity, and circulation. The contributions examine film and screen cultures in a range of locations spanning five continents: Antibes, Beijing, Buenos Aires, Busan, Cairo, Caracas, Copenhagen, Jakarta, Kolkata, Lagos, Los Angeles, Malmö, Manila, Mumbai, Nairobi, Paris, Sète, and Shanghai. The chapters address topics that range across the contemporary film and media landscape, from popular cinema, art cinema, and film festivals to serial television, public screens, multimedia installations, and video art.
