New for this edition: Crash Prevention Systems, Tire Pressure Monitoring, Security, Potholes Covers: How to recognize the five major accident situations and the human and mechanical failures that usually cause them. The basics of vehicle dynamics and why the vehicle sometimes does what it wants to do, not what the driver wants it to. The finer points of vehicle control in everyday driving (timing, maneuvering, spotting hazards) and in emergency situations such as when there are five seconds or less between the driver and a potentially serious situation. How to operate the controls with precision, accuracy, and in the proper sequence. The necessity of both mental and physical readiness and the adverse effects of fatigue and stress. Plus: Road Rage, Braking and Traction Systems, including Electronic Stability Control, Air Bags, Seat Belts and Child Safety Seats, plus Safe Driving and Auto Maintenance Tips
