Principles of Data Mining (Adaptive Computation and Machine Learning series) David J. Hand, Heikki Mannila, Padhraic Smyth

The growing interest in data mining is motivated by a common problem across disciplines: how does one store, access, model, and ultimately describe and understand very large data sets? Historically, different aspects of data mining have been addressed independently by different disciplines. This is the first truly interdisciplinary text on data mining, blending the contributions of information science, computer science, and statistics. The book consists of three sections. The first, foundations, provides a tutorial overview of the principles underlying data mining algorithms and their application. The presentation emphasizes intuition rather than rigor. The second section, data mining algorithms, shows how algorithms are constructed to solve specific problems in a principled manner. The algorithms covered include trees and rules for classification and regression, association rules, belief networks, classical statistical models, nonlinear models such as neural networks, and local "memory-based" models. The third section shows how all of the preceding analysis fits together when applied to real-world data mining problems. Topics include the role of metadata, how to handle missing data, and data preprocessing.

From reader reviews:

Joshua Montgomery:

This Principles of Data Mining (Adaptive Computation and Machine Learning series) book is not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is actually information inside this publication incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Principles of Data Mining (Adaptive Computation and Machine Learning series) without we realize teach the one who reading through it become critical in pondering and analyzing. Don't be worry Principles of Data Mining (Adaptive Computation and Machine Learning series) can bring whenever you are and not make your tote space or bookshelves' turn out to be full because you can have it inside your lovely laptop even phone. This Principles of Data Mining (Adaptive Computation and Machine Learning series) having very good arrangement in word and also layout, so you will not really feel uninterested in reading.

Diane Numbers:

Reading a reserve can be one of a lot of action that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new details. When you read a book you will get new information due to the fact book is one of various ways to share the information or perhaps their idea. Second, looking at a book will make you more imaginative. When you reading a book especially hype book the author will bring you to definitely imagine the story how the figures do it anything. Third, you may share your knowledge to other people. When you read this Principles of Data Mining (Adaptive Computation and Machine Learning series), you could tells your family, friends as well as soon about yours book. Your knowledge can inspire others, make them reading a publication.

Sang O\Connor:

Many people spending their time period by playing outside along with friends, fun activity using family or just watching TV the whole day. You can have new activity to invest your whole day by studying a book. Ugh, do you think reading a book will surely hard because you have to take the book everywhere? It ok you can have the e-book, getting everywhere you want in your Touch screen phone. Like Principles of Data Mining (Adaptive Computation and Machine Learning series) which is having the e-book version. So , try out this book? Let's notice.

Elizabeth Schwartz:

As we know that book is significant thing to add our knowledge for everything. By a e-book we can know everything you want. A book is a group of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This reserve Principles of Data Mining (Adaptive Computation and Machine Learning series) was filled in relation to science. Spend your time to add your knowledge about your

technology competence. Some people has diverse feel when they reading some sort of book. If you know how big benefit from a book, you can really feel enjoy to read a publication. In the modern era like currently, many ways to get book that you wanted.
