Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) Ting-Jun Fan

Surface properties play a very important role in many perception tasks. Object recognition, navigation, and inspection use surface properties extensively. Characterizing surfaces at different scales in given data is often the first and possibly the most important step. Most early research in machine perception relied on only very coarse characterization of surfaces. In the last few years, surface characterization has been receiving due attention. Dr. T. J. Fan is one of the very few researchers who designed and implemented a complete system for object recognition. He studied issues related to characterization of surfaces in the context of object recognition, and then uses the features thus developed for recognizing objects. He uses a multi-view representation of 3-D objects for recognition, and he develops techniques for the segmentation of range images to obtain features for recognition. His matching approach also allows him to recognize objects from their partial views in the presence of other occluding objects. The efficacy of his approach is demonstrated in many examples.

From reader reviews:

Cameron Keller:

Book is to be different for each grade. Book for children right up until adult are different content. To be sure that book is very important for all of us. The book Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) has been making you to know about other know-how and of course you can take more information. It is rather advantages for you. The guide Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) is not only giving you much more new information but also for being your friend when you sense bored. You can spend your own spend time to read your book. Try to make relationship while using book Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering). You never feel lose out for everything if you read some books.

Sally Staten:

Beside this particular Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) in your phone, it could possibly give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh in the oven so don't end up being worry if you feel like an old people live in narrow community. It is good thing to have Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) because this book offers to you personally readable information. Do you sometimes have book but you rarely get what it's interesting features of. Oh come on, that will not happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, such as treasuring beautiful island. Use you still want to miss that? Find this book in addition to read it from currently!

Michael Walker:

Is it you actually who having spare time after that spend it whole day by watching television programs or just laying on the bed? Do you need something totally new? This Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) can be the respond to, oh how comes? The new book you know. You are consequently out of date, spending your time by reading in this new era is common not a nerd activity. So what these textbooks have than the others?

Christopher Wilkerson:

Do you like reading a publication? Confuse to looking for your best book? Or your book had been rare? Why so many issue for the book? But almost any people feel that they enjoy regarding reading. Some people likes reading, not only science book but novel and Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) or others sources were given understanding for you. After you know how the fantastic a book, you feel wish to read more and more. Science e-book was created for teacher as well as students especially. Those ebooks are helping them to increase their knowledge. In

other case, beside science book, any other book likes Describing and Recognizing 3-D Objects Using Surface Properties (Springer Series in Perception Engineering) to make your spare time far more colorful. Many types of book like this.
