Managing Oak Forests in the Eastern United States

Managing Oak Forests in the Eastern United States

If you are responsible for oak management, **Managing Oak Forests in the Eastern United States** is for you. It is the definitive practical guide for anyone interested in improving stewardship of eastern oak forests.

Organized into three sections, the first section, "Background and Biology: Setting the Stage," helps you establish a solid understanding of the history and ecology of eastern oak ecosystems. It examines the question "Why do we manage oaks?" and looks at some of the challenges faced in oak management such as fire, wildlife management, and oak regeneration. It also provides a description and distribution of oak forests across the eastern United States and discusses the biology of oaks.

The second section, "Silviculture: What Is in the Tool Box," gives you a practical understanding of how management can be implemented in eastern oak forests. It covers natural regeneration, artificial regeneration, and use of prescribed fires, competition control, and intermediate treatments.

The third and final section, "Managing Oaks: How Do I Make It Work for Me?" helps you clarify your objectives and chart a course to bring about the desired outcomes for the forests you are managing. This section assists you in evaluating your progress in managing your oaks and what changes you will need to make. It provides details on management objectives for upland oaks, woodlands and savannahs, and bottomland oaks. It also gives you guidance on managing deer impacts on oak forests. The last chapter is specifically designed to help you get started.
