Molecular Invasion Critical Art Ensemble

Having exhausted the possibilities for geographic colonial expansion, as well as reaching the fiscal limitations of virtual space, capital begins its invasion of a new frontier — organic molecular space. CAE began mapping this development in *Flesh Machine* by examining the use of reproductive technologies and their promise for achieving an intensified degree of control over worker and citizen. *Molecular Invasion* acts as a companion to this first book by mapping the politics of transgenics, and offering a model for the creation of a contestational biology, as well as providing direct interventionist tactics for the disruption of this new assault on the organic realm.
