On the Hypotheses Which Lie at the Bases of Geometry (Classic Texts in the Sciences) Bernhard Riemann

This book presents William Clifford's English translation of Bernhard Riemann's classic text together with detailed mathematical, historical and philosophical commentary. The basic concepts and ideas, as well as their mathematical background, are provided, putting Riemann's reasoning into the more general and systematic perspective achieved by later mathematicians and physicists (including Helmholtz, Ricci, Weyl, and Einstein) on the basis of his seminal ideas. Following a historical introduction that positions Riemann's work in the context of his times, the history of the concept of space in philosophy, physics and mathematics is systematically presented. A subsequent chapter on the reception and influence of the text accompanies the reader from Riemann's times to contemporary research.

Not only mathematicians and historians of the mathematical sciences, but also readers from other disciplines or those with an interest in physics or philosophy will find this work both appealing and insightful.

From reader reviews:

Willie Hodges:

Now a day people who Living in the era just where everything reachable by match the internet and the resources in it can be true or not need people to be aware of each facts they get. How a lot more to be smart in having any information nowadays? Of course the answer then is reading a book. Reading through a book can help individuals out of this uncertainty Information especially this On the Hypotheses Which Lie at the Bases of Geometry (Classic Texts in the Sciences) book because this book offers you rich info and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it everbody knows.

Jean Young:

This book untitled On the Hypotheses Which Lie at the Bases of Geometry (Classic Texts in the Sciences) to be one of several books in which best seller in this year, here is because when you read this guide you can get a lot of benefit into it. You will easily to buy this particular book in the book shop or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Smartphone. So there is no reason for you to past this guide from your list.

Chad Davis:

Reading a guide can be one of a lot of action that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new facts. When you read a book you will get new information simply because book is one of many ways to share the information or maybe their idea. Second, examining a book will make a person more imaginative. When you looking at a book especially fiction book the author will bring that you imagine the story how the character types do it anything. Third, you are able to share your knowledge to others. When you read this On the Hypotheses Which Lie at the Bases of Geometry (Classic Texts in the Sciences), it is possible to tells your family, friends and soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a guide.

Larry Hayes:

Reading can called mind hangout, why? Because while you are reading a book mainly book entitled On the Hypotheses Which Lie at the Bases of Geometry (Classic Texts in the Sciences) your thoughts will drift away trough every dimension, wandering in every single aspect that maybe unidentified for but surely might be your mind friends. Imaging just about every word written in a guide then become one web form conclusion and explanation which maybe you never get ahead of. The On the Hypotheses Which Lie at the Bases of Geometry (Classic Texts in the Sciences) giving you a different experience more than blown away the mind but also giving you useful information for your better life on this era. So now let us demonstrate the

relaxing pattern here is your body and mind is going to be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary shelling out spare time activity?
