Leveled Texts for Science: Earth and Space Science Joshua BishopRoby

Explore the wonders that surround our planet and solar system with engaging texts that promote classroom differentiation and gear all student readers toward success. Topics ranging from plate tectonics to fossils and inner to outer space offer four visually identical texts, each suited for below, on, and above grade levels, and English language learners. Each high-interest informational text is perfect for close reading or small-group instruction and is complemented with comprehension questions specific to each reading level. This resource is aligned to college and career readiness standards.

About Shell Education

Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.
