Meta-Heuristics: Theory and Applications

Meta-heuristics have developed dramatically since their inception in the early 1980s. They have had widespread success in attacking a variety of practical and difficult combinatorial optimization problems. These families of approaches include, but are not limited to greedy random adaptive search procedures, genetic algorithms, problem-space search, neural networks, simulated annealing, tabu search, threshold algorithms, and their hybrids. They incorporate concepts based on biological evolution, intelligent problem solving, mathematical and physical sciences, nervous systems, and statistical mechanics. Since the 1980s, a great deal of effort has been invested in the field of combinatorial optimization theory in which heuristic algorithms have become an important area of research and applications.

This volume is drawn from the first conference on Meta-Heuristics and contains 41 papers on the state-of-the-art in heuristic theory and applications. The book treats the following meta-heuristics and applications: Genetic Algorithms, Simulated Annealing, Tabu Search, Networks & Graphs, Scheduling and Control, TSP, and Vehicle Routing Problems. It represents research from the fields of Operations Research, Management Science, Artificial Intelligence and Computer Science.

From reader reviews:

Alan Fan:

This book untitled Meta-Heuristics: Theory and Applications to be one of several books this best seller in this year, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy that book in the book retail store or you can order it via online. The publisher of this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Mobile phone. So there is no reason to your account to past this guide from your list.

Sherrill Height:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your day to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you have problem with the book as compared to can satisfy your short space of time to read it because pretty much everything time you only find guide that need more time to be study. Meta-Heuristics: Theory and Applications can be your answer because it can be read by a person who have those short extra time problems.

Filiberto Dacosta:

This Meta-Heuristics: Theory and Applications is new way for you who has attention to look for some information given it relief your hunger of information. Getting deeper you onto it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Meta-Heuristics: Theory and Applications can be the light food for you personally because the information inside this kind of book is easy to get simply by anyone. These books develop itself in the form which can be reachable by anyone, yep I mean in the e-book contact form. People who think that in publication form make them feel drowsy even dizzy this e-book is the answer. So you cannot find any in reading a publication especially this one.
