**Fundamentals of Parallel Multicore Architecture (Chapman & Hall/CRC Computational Science)** Yan Solihin

Although multicore is now a mainstream architecture, there are few textbooks that cover parallel multicore architectures. Filling this gap, **Fundamentals of Parallel Multicore Architecture** provides all the material for a graduate or senior undergraduate course that focuses on the architecture of multicore processors. The book is also useful as a reference for professionals who deal with programming on multicore or designing multicore chips.

The text's coverage of fundamental topics prepares students to study research papers in the multicore architecture area. The text offers many pedagogical features, including:

- Sufficiently short chapters that can be comfortably read over a weekend
- Introducing each concept by first describing the problem and building intuition that leads to the need for the concept
- "Did you know?" boxes that present mini case studies, alternative points of view, examples, and other interesting facts or discussion items
- Thought-provoking interviews with experts who share their perspectives on multicore architectures in the past, present, and future
- Online programming assignments and solutions that enhance students' understanding

The first several chapters address programming issues in shared memory multiprocessors, such as the programming model and techniques to parallelize regular and irregular applications. The core of the book covers the architectures for shared memory multiprocessors. The final chapter contains interviews with experts in parallel multicore architecture.

### **From reader reviews:**

#### **Lois Reyna:**

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a walk, shopping, or went to typically the Mall. How about open as well as read a book called Fundamentals of Parallel Multicore Architecture (Chapman & Hall/CRC Computational Science)? Maybe it is for being best activity for you. You already know beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have additional opinion?

#### **Leroy Torres:**

What do you in relation to book? It is not important with you? Or just adding material when you want something to explain what you problem? How about your free time? Or are you busy person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every person has many questions above. They should answer that question because just their can do that will. It said that about e-book. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need that Fundamentals of Parallel Multicore Architecture (Chapman & Hall/CRC Computational Science) to read.

#### **Gayle Skinner:**

The guide untitled Fundamentals of Parallel Multicore Architecture (Chapman & Hall/CRC Computational Science) is the book that recommended to you to study. You can see the quality of the publication content that will be shown to an individual. The language that author use to explained their way of doing something is easily to understand. The author was did a lot of research when write the book, and so the information that they share to you is absolutely accurate. You also might get the e-book of Fundamentals of Parallel Multicore Architecture (Chapman & Hall/CRC Computational Science) from the publisher to make you considerably more enjoy free time.

#### **Jacob Florence:**

Do you have something that you prefer such as book? The e-book lovers usually prefer to pick book like comic, small story and the biggest you are novel. Now, why not trying Fundamentals of Parallel Multicore Architecture (Chapman & Hall/CRC Computational Science) that give your pleasure preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the method for people to know world much better then how they react when it comes to the world. It can't be stated constantly that reading addiction only for the geeky man but for all of you who wants to become success person. So , for all you who want to start reading through as your good habit, you are able to pick Fundamentals of Parallel Multicore Architecture (Chapman & Hall/CRC Computational Science) become your personal starter.
