The use of medical lasers has escalated within the past decade and one of the disciplines in which their use has become firmly established is otolaryngology. This state-of-the-art account of when and how lasers should and should not be used within this discipline is written by acknowledged experts in the various fields from both sides of the Atlantic. There is also full coverage of laser physics, medical laser safety and 'laser-safe' anaesthesia. The book provides an up-to-date account of medical laser use in otolaryngology, of value to all specialists in the field at all levels of medical expertise. This book should be of interest to otolaryngologists.
