The Physics of Laser-Atom Interactions (Cambridge Studies in Modern Optics)

Dieter Suter

The Physics of Laser-Atom Interactions (Cambridge Studies in Modern Optics) Dieter Suter

This book provides a thorough introduction to the interaction of atoms and atomic ions with optical and magnetic fields. The author places particular emphasis on the wealth of important multilevel effects, where atomic vapors exhibit anisotropic behavior. As well as covering the classic two-level atom approach to light-atom interactions, Suter describes in detail a general multilevel formalism, which he uses to discuss optical pumping, two-dimensional spectroscopy and nonlinear optical dynamics. The final chapter deals with the mechanical effects of light, including the cooling and trapping of atoms. With full theoretical and experimental coverage, and over 250 illustrations, the book will be of great interest to graduate students of laser spectroscopy, quantum electronics and quantum optics, and to researchers in these fields.

From reader reviews:

Amos Curley:

The book *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics) gives you the sense of being enjoy for your spare time. You may use to make your capable considerably more increase. Book can being your best friend when you getting anxiety or having big problem along with your subject. If you can make examining a book *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics) to get your habit, you can get considerably more advantages, like add your capable, increase your knowledge about some or all subjects. You may know everything if you like open and read a book *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics). Kinds of book are a lot of. It means that, science e-book or encyclopedia or other people. So , how do you think about this book?

Christopher Burnham:

The book *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics) can give more knowledge and information about everything you want. Why then must we leave a very important thing like a book *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics)? A few of you have a different opinion about publication. But one aim this book can give many facts for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or data that you take for that, it is possible to give for each other; it is possible to share all of these. Book *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics) has simple shape however you know: it has great and massive function for you. You can appear the enormous world by open and read a reserve. So it is very wonderful.

Susan Bondurant:

Here thing why this particular *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics) are different and trustworthy to be yours. First of all reading a book is good however it depends in the content of computer which is the content is as yummy as food or not. *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics) giving you information deeper and different ways, you can find any publication out there but there is no e-book that similar with *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics). It gives you thrill examining journey, its open up your personal eyes about the thing that happened in the world which is probably can be happened around you. It is possible to bring everywhere like in recreation area, café, or even in your way home by train. When you are having difficulties in bringing the paper book maybe the form of *The Physics of Laser-Atom Interactions* (Cambridge Studies in Modern Optics) in e-book can be your substitute.

Dena Ramirez:

Nowadays reading books be than want or need but also work as a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge even the information inside the book which improve your knowledge and information. The details you get based on what kind of publication you read, if

you want drive more knowledge just go with education books but if you want sense happy read one having theme for entertaining such as comic or novel. The The Physics of Laser-Atom Interactions (Cambridge Studies in Modern Optics) is kind of guide which is giving the reader erratic experience.
